

WANTED

We need your support to approach the Federal Government to fund the installation of solar panels on every Scout hall in Australia.

WHY?

Because Scouts Australia are pioneers in environmental sustainability.

By installing 1.5kW solar panels on our 1229 facilities, we can reduce power consumption by 2,240MW/h and carbon emissions by 1,990 tonnesCO2 annually. If Scouts Australia receive this funding, it will be the only organisation in the world to be self sufficient in water and energy.

HOW CAN I HELP?

You can help by registering you support on the Scouts Australia website:

www.scouts.com.au/projects

Your support is needed so register now!
